

QST User Manual gstonline.org

1. Instructors

- a. Creating Questions
- b. Files Images, PDF/Files, file descriptions
- c. Inserting Videos
- d. Exporting/Importing Questions
- e. Create a QST
- f. Make your QST available to your users Post
- g. Branching Questions
- h. Changing QST's
- i. GradeBook
- j. Printing a QST
- 2. Students
- 3. Question Bank Admin
- 4. Mobile/Phone/Lock down browsers.

Info.

- After 4 unsuccessful logins, a user is locked out for 3 minutes.
- Mobile is only available to students.
- Phone browser is WCAG AA compatible.

Suggestions to help in understanding and using QST:

Organize your questions by folders:

- Grade

- Subject
 - Topic
 - Unit
 - questions

or some similar file system structure that will make using your question bank easier for you. Your curriculum system design should underlie the structure of the question bank.

The SOURCE (folder) the question is in can be displayed for the students Submitted QST and also when you go to change the QST, View a QST, View/Mark a QST, or Export a QST as PDF.

Showing the SOURCE to the students helps them identify the Unit to find further information for the question.

In the GradeBook organize your quizzes by Topic and the questions come from the Units.

- if you click on the quiz number and then on Stats, you can see how the class did on each question in that QST.
 - If you grouped your questions (example: first 5 questions are from Drift velocity Unit), then you easily see how the class performed on each question on that Unit as you can see how often the questions were gotten right, wrong, etc..
 - Clicking on the number of incorrect answers for that question displays the names of the students that got it wrong. The questions with a high number of wrong answers suggest the class as a whole has a hard time with question. So this would be a Unit to focus your teaching on. Seeing the same students names coming up regularly by clicking on the number of wrong answers suggest who to focus your time on. Looking at their marks in the GradeBook would show if this was a one time issue or whether the student has been struggling all along.
 - QST Details provides you with very detailed information on the results of a QST. This can be imported to Excel or some other stats package which will empower you to do further detailed analysis of questions, etc..

Explanations and SOURCE can be toggled to show or not.

In your Explanations you may want to add a 'reading' tag so the students know where to find further information. This would display to them after they submitted the QST and it was Posted with the permissions that it was viewable and Explanations was checked. They can make some notes on which readings to focus on.

It is advisable to not have text in your images that would lead a person to surmise what the answer may be or asks the actual question.

QST has seven different question types which combined with the Memory option provides 14 different types of question interactions. Memory allows for the secure one time display to individuals of material without the insecurity of using javascript nor H5P.

If you have QST installed on your local lan and no/poor internet connection and you would like to show math and chemistry equations, create the questions using QST EQ, save them as MathML and you can paste them into the advanced editor after you have clicked on View Source </> button in toolbar.

More information is available further below.

1. Instructors

To the right is the home screen for Instructors.

Here you manage your questions, quizzes, surveys, tests, images and pdf's.

GradeBook provides the ability to view your users results, create a marking rubric and enter Assignment marks.

Your Administrator will be in control of creating your students and classes and assigning your students to the appropriate classes.

a. Creating Questions

Click on Questions, then click on My Questions and either select *Create Folder* to place your questions in (recommended - so your questions are grouped and easier to find/use later) or select *Create Question*, which will cause a new window to open with the Question Builder screen available.

You can flip between editors and the only contents saved is that in the editor showing when you save the question (also applies to the answer type).

We provide the ability to create the question and then choose which type of answer to accompany it, and can be altered later.

The Advanced Editor

B	I !	<u>U</u> 🖪	X ² X ₂	Arial 🕶	16 •	A •	i≣ ¦≣	≡ •			
						_					

If you enter an **Explanation**, it will show when their QST is marked for them when you have **Submissions** are viewable *checked* and **Explanations** *checked* when you **Post** the QST.

A **Memory** is displayed to the student before the question is shown.

- It is only displayed once and cannot be viewed again by the student when quiz questions are displayed singly.
- It will show when their QST is marked for them when you have Submissions are viewable checked and Memory checked when you **Post** the QST.

The Equation Editor is for creating Math Equations. If you are familiar with MathML or LaTex, just enter the code. Also supports mhchem for MathJax. Otherwise use **QST EQ**.

The Basic Editor is good for showing code samples, HTML, etc.. It is an editor that guarantees no malicious scripts, etc. can be embedded. Links to video and audio on other sites can be entered.

Create an Advanced question with Multiple Answer type chosen.

The Basic Editor is excellent for displaying code samples and producing simple questions quickly. Using the Basic Editor ensures no iframes or malicious scripts can be embedded in the question or answers. Also, a pdf can be made available for your users to read.

** If you are using DropBox links, change the ?dl=0 at the end to ?raw=1 for Video and Audio links.

Bypass - Inserting an image into Equation Editor using Show source:

Open the Advanced editor, add the image, click on the </>> (Show source - on the far right) in the Advanced editor toolbar. copy the <img <pre>src="/schools/qst_files/136.png" style="width: 52px;" alt=""> tag and then open the Equation editor and paste it in where you would like it.

You can add some HTML to center it, etc..

Always Preview the question (not just the Preview Equation) to see how it will look for the users.

Bypass - Inserting a PDF into Equation Editor using View page source:

Open the Basic Editor, click on PDF to the right of text box, select your PDF, Preview the question, right click next to View PDF and choose View page source, copy the onclick="window.open('/schools/qst_files/939.pdf','pdf_windo','width=700,height=800 ')"><i>*View PDF</i><P> bit and paste it into the Equation Editor.

Always Preview the question (not just the Preview Equation) to see how it will look for the users.

The Equation editor will accept HTML tags.

QST EQ

QST EQ is an advanced WYSIWYG editor used to create math and chemical equations and formulas. Logic, symbols, arrows, greek and function symbols are also available.

QST EQ	Select an item from left menu or input LaTeX, TeX, MathML, mhchem or AsciiMath.
Math GK/Func Logic Arrow Symbol Format	∽ ∾ ▲ ▲ \frac{-b\pm\sqrt{b^2-4ac}}{2a}
$egin{array}{cccccccccccccccccccccccccccccccccccc$	
$ \begin{array}{cccc} \widehat{ab} & \stackrel{\leftarrow}{ab} & \stackrel{\rightarrow}{ab} & \stackrel{\rightarrow}{ab} \\ ab & ab & \overline{ab} \\ ab & \underline{ab} & \overline{ab} \\ \hline ab & \underline{cd} & \frac{\partial a}{\partial b} & \frac{\mathrm{d}x}{\mathrm{d}y} & \lim_{a \to b} \end{array} $	LaTeX/TeX Mode Right click yellow highlight below for MathML Save and Close Cancel
$\int_{a}^{b} \oint_{a}^{b} \prod_{a}^{b} \prod_{a}^{b} \prod_{a}^{b}$	$\frac{-b\pm\sqrt{b^2-4ac}}{2a}$
$\begin{bmatrix} & & & \\ & & & \\ & & \\ & \\ & \\ a \end{bmatrix} = \begin{bmatrix} & & \\ & \\ & \\ & \\ & \\ & \\ & \\ & \\ & \\$	
$\begin{bmatrix} a & b \\ c & d \end{bmatrix} \begin{cases} a & x = 0 \\ b & x > 0 \end{cases}$	

Export as MathML to place into web pages.

QST EQ	Select an item from left menu or input LaTeX, TeX, MathML, mhchem or AsciiMath.
Math GK/Func	
Logic Arrow	MathJax MathML Expression
	<pre><math <="" td="" xmlns="http://www.w3.org/1998/Math/MathML"></math></pre>
$\bigcap_{a}^{b} \bigcup_{a}^{b} \bigvee_{a}^{b}$	Copy to Clipboard
$\begin{bmatrix} b \\ a \end{bmatrix} = \begin{bmatrix} b \\ a \end{bmatrix} = \begin{bmatrix} a \\ b \end{bmatrix} = \begin{bmatrix} a & x = 0 \\ b & x > 0 \end{bmatrix}$	

Click Advanced or Equation or Basic to change editor.

Enter a Mark for the question. The Mark may also signify the difficulty of the question.

A Description must be entered for each question as this is what is displayed when browsing for questions.

Default answer selections are available which will provide you with templates to begin with.

Enter up to 15 answers.

Multiple Choice and Multiple Answer answers have Advanced, Equation and Basic editors.

Paragraph answers have an Advanced and Basic editor.

Create your equation/formula with QST EQ, then paste into an answer selection surrounded by \$\$.

****** Always Preview your question before saving it to see how it will appear to a student. This duplicates the display window in the QST.

Create more questions - It is much simpler to group and create your questions in advance of creating a QST. This is especially wise in the case of branching questions, where the complexity increases very quickly.

b. Files - Images, PDF's

Upload your images and pdf's that you wish to use in your questions or answers by clicking on **files** in the left screen.

Max width for images in questions should be 450 pixels.

In the Basic editor click on 🛛 🗮	

Click on the checkbox in front of image to automatically insert it.

c. Inserting Videos

We do not let you upload videos due to the bandwidth they require for large scale use.

Our Rich Text Editor allows linking to videos on the following platforms: YouTube, Vimeo, Vine, Instagram, DailyMotion or Youku.

YouTube's licensing agreement (from our non-legal background) means that YouTube and anyone in the world can do anything with your uploaded videos. Some individuals/schools/institutions don't mind this, but others might not want their competitors using videos they created.

Vimeo. Is a pay-for solution, but you are not giving away videos. You can explore various purchase plans yourself on the Vimeo website. In Vimeo, set videos to "unlisted," meaning that folks searching Vimeo will not find them. You can also restrict embedding to specific domains, like your school or institution's domain.

Our Basic Editor allows linking to videos anywhere.

Go to the youtube video you want and copy the **url** in the toolbar:

How to use QST to easily create online quizzes/survey and tests 20 views • Mar 4, 2021

● 0 ● 0 → SHARE =+ SAVE ...

Click on the video icon in the Advanced editor:

	Insert Video

Videos should have Closed Captioning to be WCAG compatible.

d. Exporting/Importing questions

Exported questions will include the images and pdf's in the question or answers. The images are base 64 encoded (in QST XML and Moodle XML). Also the Explanations and file descriptions (for screenreaders) will be included.

Questions can be exported in QST XML, Moodle XML, QTI 2.2 zip format and PDF.

	QST - Brave	£.	- 0	8
localhost/qst/or	ne		1 🦁	₽
	Export question	ons		
QST XML	Moodle XML	QTI 2.2		=
	Export Ca	ncel		

Under My Questions, click on a folder name to export all the questions in that folder.

This will only export all the questions in the folder, it will not recurse through folders under that folder.

Images in questions and answers will be included in the export file.

TIP - Create a New folder and copy/paste questions into it, then Export.

Click on a folder name to Import Questions to it. Any images associated with the question or it's answers will be saved under My QST Files/Import Images QST Date and Time.

Importing Word XML and Text files:

Multiple choice - single answer questions (15 answers max.), Multiple choice - many answers, Short Answer and Paragraph questions may be imported.

** Text questions will import the Explanations and Memory to the questions.

- * Images (in questions and answers) will be imported also for .docs
- A folder will be created under QST Files with the name Imported Images Word and the date and time

Open your word .doc or .txt file and make sure you put QST (with a space after it) as the first word at the beginning of each *question*.

There is no need to number the questions

Each *answer* should have)@ at the beginng of the line with each answer,

example)@ answer

Each *correct answer* should have ** as the first letters of the answer.

The character combinations)@ and ** and QST should not be used in any *questions or answers* as they are special character in the import format.

Once you have done the above, save your word doc as xml and import it.

If no correct answers are indicated, the first answer will be set as correct.

Check your questions after you have uploaded them for any issues.

An example of Multiple Choice:

QST What is the bird below?

An example of Many Answers:

QST Select all the cities that are within Alberta.

)@ **Calgary)@ Winnipeg)@ **Red Deer)@ **Edmonton)@ Victoria)@ Toronto

An example of Short Answer:

QST Who invented the theory of relativity?

)@ **Albert Einstein

An example of Paragraph:

QST Why is the sky blue?

)@ **Because of the refraction of the light as it is passing through the atmosphere.

An example of including Explanation and Memory in Text question:

QST Who did not go along for the ride?

)@ Dave
)@ Bill
)@ Kristin
)@ ** Donna
%EXPLAN% Donna's name was never mentioned.
%MEMORY% Dave, Bill, Don and Kristin went for a drive in the country and saw cows, sheep and a horse.

Importing/Exporting Moodle XML files:

Only multiple choice, matching, true/false, short answer and essay questions may be imported. Matching questions may only be text.

* Images (in questions and answers) will be imported also

ALT text in images will be imported as File Descriptions in QST for WCAG AA compliance

A folder will be created under QST Files with the name Imported Images Moodle and the date and time Check your questions after you have uploaded them for any issues.

Importing/Exporting QTI 2/3 format files:

Only xml and zip files imported.

Only multiple choice, matching, true/false, short answer and essay questions may be imported. Matching questions may only be text and contain 70 characters.

* Images (in questions and answers) will be imported also

A folder will be created under QST Files with the name Imported Images QTI ZIP and the date and time

Check your questions after you have uploaded them for any issues.

Importing/Exporting QST XML files:

```
All question types are imported.
  * Images (in questions and answers), file descriptions and Explanations will be imported also
   A folder will be created under QST Files with the name Imported Images QST XML and the date and time
 Check your questions after you have uploaded them for any issues.
Share your questions with other QST users or your Question Bank Admin.
      Twenty-five questions containg images in questions and answers will load in
            approx. 10 - 20 seconds. The file size will be approx. 800Kb.
Question Bundles are available to Import at gstonline.org under Info.

You may want to deliver your QSTS's differently to acheive your goals.

Sometimes you may want to ask a question based upon a previous question and do not want the user to refer back to the question. Often you want the user to have immediate feedback. Other times only provide feedback at the end, or not at all.

Traditional method of paper assessment - displaying all questions is also available.

```
Delivery:

Paper – All Questions

Single Question – Jump

Single Question – Next No going back to previous questions.

Single Question – Answer

Single Question – Branch
```

```
Display:
```

New Window - QST will appear in a new window, and may be resized. - ** Use this so students cannot use the browser back button. New Window No resize - QST will appear in a modal and cannot be resized. QST's containg random questions or branching questions cannot be shuffled.

- Have the Administrator create a demo student for you, then you can try different combinations of the options available for Posting the QST.The demo student will not be counted in the GradeBook as long as they have no marks for a QST.Delete the demo students mark after you have attempted the QST.
- ** If you add a student to a class, You must re-post any QST's available to that class so that student has access to them.

g. Branching Questions

Only True/False, Yes/No, Multiple Choice - Single Answer questions can be branched. A single answer, multiple answers or all answers may be branched.

A popup will appear and click on *Question* next to an answer.

A new popup will appear with your Question Bank questions.

Clicking on the radio button in front of a question will add the question as a branch for that answer.

Clicking on *Question* for the next answer will clear your previous selection in your Question Bank, and you can now choose a new question.

- If an answer is not branched, then if that answer is selected by a user, the QST will continue to the next Primary question.
- Primary Questions may be re-arranged in order and still contain the same branching questions under them.
- Usually Primary Questions would be something you would ask of every user, however, some QST's may only contain one Primary Question, and all the answers lead in separate directions.

Deleting a Primary Question deletes all branching questions under it.

If you delete a branch under a question, all questions and branches beneath it will be deleted.

Because branching questions can get very complex quickly, it is best to map out your design before beginning to save you time.

There is no limit to the level of branching under a question.

h. Changing a QST

You may only change a QST if it has not been taken by a student yet.

- You can add questions, delete questions, alter the order of the questions, add question groups and specify how many questions to choose from the group and the mark for each question and alter the questions in a group. Additionally you can show SOURCE – display the folder the questions came from.
- If you add a Branching/Adaptive question to a QST, all the marks will be removed for the QST as they become very difficult to interpret.

O Introductory Class	& Assig	nment	€ Dis	splay	⊥ GradeBook
QST/Assignment:	1 ₂₀ Introductory Quiz Delete View Stats Marks 23 Weight 20%	2 ₅₀	3 ₃₀	Total o	f weights = 100 %
1 Bhirley Bolat	5/4.3			4.3	
2 Adesh Bahart	10/8.7		9	8.7	
3 Rob Crow	10/8.7	IP		8.7	
4 Xiam Gupta	3/2.6			2.6	
5 Patricia Herchek	20/17.4		30/30.0	47.4	4
6 Carl Kolotylo	<mark>9</mark> /7.8			7.8	

Click on Weight to set the % value of the QST in the Total Mark.

When a students starts a QST, it will be shown as **IP** (in progress) in the GradeBook.

Once a QST is started, an end time is set for the QST for that user.

Once they have submitted the QST, it will show their score.

- If they did not submit the QST before the time is up, the QST will still show as
 IP, and the instructor will have to click on the IP to View/Mark and submit
 the QST for them.
 Then a mark will be shown. May have to refresh Display.
- If the QST is posted with multiple attempts and Record Mark is **not** chosen, in the GradeBook the number of attempts at the QST will be shown A-2 for 2 attempts.
- If the QST is posted with multiple attempts and Record Mark is chosen, a mark will be shown for the QST in the GradeBook. The number of attempts will not be shown as only the highest mark is kept and therefore it is likely the student will use all the attempts to improve on their mark.

Click on a student's mark to view/mark their submitted Quiz/Test.

In the case a student has to Resume a QST, click on IP for their QST and click
 Resume. This will allow them to re-log in to that QST, as long as there is
 time remaining in it for them.

If they have been locked out for more than a minute, consider adding some time to their QST. Adding time adds time to the end time of the QST for that user.

A QST cannot be **Resumed** after the end time has passed unless more time is added to the users QST and it is still available under **Posted**.

Resume is intended to let users continue an important QST.

The QST will be displayed to the user as having **0** attempts.

The Time remaining shown to them will be the time difference from their last question answered and the end time of their QST.

They will be restarted at the last question they answered.

Only resume a QST for a user if it is set to only **1 attempt**. Otherwise they can just attempt it again.

Only **Paper-all questions**, **Single question-jump** and **Single question-next** Delivery styles will work with Resume.

Resume will not work with Display Modal - no resize chosen.

11 Robert Stall IP 1/1.2 -- -- 1.2 Delete Bonus View/Mark + Time Resume

- You can **add time** to a users QST by clicking on **IP** for their QST and click **+ Time**. Adding time to their QST will not change their Time Remaining display (unless they are resuming a QST), so advise them to keep answering questions until you notify them to Submit their QST or QST display tells them too.
- You may **delete** a student's QST here if you would like to give them another attempt. If the QST is still available the student may retry it again.
- If the QST is over, the student will not be included in the average for that QST as they do not have a mark.

The GradeBook always shows all the students in the class.

- * To see averages for a QST a weight must be given to it.
- * For QST's and Assignments to show in the downloaded GradeBook they must be given a weight(%). Weights do not show in dwonloaded GradeBook.
- * Students that did not take a QST, will not have a mark for that QST and will not be included in the average for that QST.

Clicking on View/Mark on a students QST mark will show you the following screen where you can also Print the students marked QST or Save it as a PDF to keep for

your records or email to your students. The time they answered each question is displayed also.

There is a Comments section at the bottom of the QST.

5. (1) Match the city to the country.

No Answer	
montreal	🖌 canada
paris	✓ france
milan	🖌 italy

Answered on (M/D/Time): 0

6. () Write how an engine works.

No Answer - 0 pts Correct Answer:

An engine works by gas exploding in the cylinders causing the cylinders to go up and down, which in turn rotates the crankshaft which turns the drive shaft, which then turns the wheels

Answered on (M/D/Time): 0

Comments

Clicking on the word will display a textbox for your comments. The text will not be saved and will display in the PDF or printed QST. 6. () Write how an engine works.

No Answer - 0 pts Correct Answer:

An engine works by gas exploding in the cylinders causing the cylinders to go up and down, which in turn rotates the crankshaft which turns the drive shaft, which then turns the wheels

Answered on (M/D/Time): 0

Comments

Creating an **Assignment** will allow you to also set a mark for the assignment and a weight.

Click on -- under the Assignment to add a Mark for a user.

Downloading the GradeBook (in .csv or .json format) includes QST's and Assignments with a mark for each student. If the student did not attempt a QST, there will be no mark in the download for them.

The QST must have a weight(%), otherwise it will not be included in the download.

i. Print a QST to dispense to class

Click on Quizzes/Tests and then My Quizzes. Click on a QST shown and click Print.

Click **QST**.

- * It will display equations, images, etc..
- * Put letters of the alphabet in the beginning of answers if you need to see a, b, c, d, etc. in the answers and in the answer sheet.

When you click Print, you can choose to also save the QST as a PDF.

If you save it as a PDF, if you have LibreOffice you can open the PDF, make changes to the QST as suits your needs then print it for your students. LibreOffice may not always display the PDF correctly.

You can also convert the PDF to .docx format at <u>http://adobe.com/acrobat/online/pdf-to-word.html</u> and make changes to it in Microsoft Word and then print it for your users.

2. Students

Students can log into the QST on the homepage, or if using a phone browser click on Phone browser.

Phone browser displays one question at a time (no matter what setting is chosen for Delivery when Posting a QST).

Phone browser partially works with screen readers and our work to make it WCAG AA compliant is ongoing.

If you want your users to go to phone browser the url would be: https://your_web_server_name/mobile_qst.htm

Read 'Run QST on your laptop for your users' at https://qstonline.org/faq.htm to find the IP address of your QST installation for users on your lan to access it.

qst	×
Introduction to QST

Survey	5? Another Survey	

Once the quiz/survey/test is begun, it counts as an attempt.

Clicking on the QST name will start the QST. You can only Submit the QST after you have gone through all the questions.

In **normal mode**, after the students have logged in, the left side of the screen shows their name and optional photo along with the classes they are in.

Clicking on a class name displays the QST's available to the student on the right. Selecting a QST will display a popup with instructions for the QST. The QST is only marked as attempted after the student selects OK in the popup.

qst	
	Introduction to QST
Bob Hill	Attempts 1 143 ? 143 ~ Quiz of Sample Questions
Introduction to QST	Once the quiz/survey/test is begun, it counts as an attempt. Click on quiz/survey/test name for options.

If a student is taking a QST Paper style or Single question-Jump, they can unselect the question checkbox on the right side of the screen of an answered question so they will notice to review it before Submiting the QST.

Selecting an answer automatically saves it to the server and marks it as Answered. Short Answer and Paragraph questions click Save Answer to do the same.

The questions are saved to the server as the students answer them. If a students computer goes down or they lose their internet connection they can be allowed to Resume the QST.

Having the server on your network greatly reduces the chances of network loss and

ensures the privacy of your users information.

3. Question Bank Admin

The screen is similiar to the Instructors screen, but the user can only create/export/import questions and make folders in the bank.

They have access to the whole Question Bank and questions placed in here are available to all instructors in the organization.

4. Mobile/Phone/Lockdown browsers

Mobile/Phone

This is only for students to take a QST.

QST is available on both android and iphone (Safari) for students.

QST delivery via the android app or phone browser is single question-next.

On the login page there is <u>Phone Browser</u>, which adjusts the screen to fit for all phones. Use this if you do not have the app for your phone. It provides the same display as the android apps do.

QST's delivered by the phone browser option allow the user to use the back buttons in the browser and they can return to previous questions.

In QST's delivered through the **android app** the user only has the option to move forward through the questions. They cannot return to a previous question.

You will need to provide the students with a server name (the url to your qst installation home), along with their usernames and passwords.

The server name must be a valid internet domain name or a valid internet IP number. - qst-android-http.apk does not require a certificate and can be used on your local network. - In server put your local network IP of your QST server.

QST for android is available on Google Play and also at QST on sourceforge.net . Sourceforge has both versions.

Lock down browsers

You may want to use Chrome Kiosk Mode to lock down the browser on chrome managed devices or Chrome on Windows.

Microsoft Edge Kiosk Mode is also available.

Safe Exam Browser may be another option you might want to consider.

All are free.
